PROFESSIONAL SUMMARY

Computer Science and Artificial Intelligence student with hands-on experience developing ASP.NET Core MVC applications and RESTful Web APIs using C#, Entity Framework Core, SQL Server, and Redis. Experienced in building backend applications with Onion and 3-Tier architectures and applying Repository, Unit of Work, Specification, and Result patterns. Familiar with JWT authentication, ASP.NET Core Identity, AutoMapper, LINQ, Swagger, and Postman. Seeking an ASP.NET Core Backend Internship or Junior Backend Developer opportunity.

TECHNICAL SKILLS

Languages: C#, SQL, C++

Backend: ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, LINQ, AutoMapper

Authentication: ASP.NET Core Identity, JWT Authentication

Databases & Caching: SQL Server, Redis

Architecture: Onion Architecture, 3-Tier Architecture

Design Patterns: Repository, Unit of Work, Specification, Result, Dependency Injection

Tools: Git, Swagger, Postman, Visual Studio, VS Code

PROJECTS

E-Commerce API | ASP.NET Core Web API, EF Core, SQL Server, Redis, C#

- Developed a RESTful ASP.NET Core Web API following Onion Architecture with separated Domain, Application, Infrastructure, and API layers.
- Implemented Specification Pattern for filtering, sorting, searching, and pagination, together with Repository and Unit of Work patterns.
- Integrated Redis response caching through a custom Action Filter and secured API endpoints using JWT Authentication.

Clinic Management System | ASP.NET Core Web API, EF Core, SQL Server, Identity, JWT, C#

- Developed a clinic management RESTful Web API using layered/Onion Architecture with Domain, Application, Infrastructure, and API separation.
- Implemented doctor, patient, appointment, specialization, and working-hours management with business validation and scheduling logic.
- Applied Repository, Unit of Work, Specification, Result, and Dependency Injection patterns, with AutoMapper and FluentValidation.
- Integrated ASP.NET Core Identity and JWT Authentication with role-based access for secure user and doctor management.

Gym Management System | ASP.NET Core MVC, EF Core, SQL Server, C#

- Developed a full-stack ASP.NET Core MVC application using a 3-Layer (N-Layer) Architecture.
- Implemented Repository and Unit of Work patterns with Entity Framework Core for data access.
- Integrated ASP.NET Core Identity, AutoMapper, Fluent API, and Result Pattern.

CRUD Web Application | Next.js, TypeScript, Tailwind CSS

- Built a responsive CRUD application using Next.js and TypeScript with file-based routing and server-side rendering.
- Applied component-based architecture and deployed the application on Vercel.

EDUCATION

Benha University — Faculty of Computer Science and Artificial Intelligence

B.Sc. in Computer Science and Artificial Intelligence | 2023 – 2027

Relevant Coursework: Data Structures, Design and Analysis of Algorithms, Object-Oriented Programming, Databases, Operating Systems, Computer Networks, Advanced Computer Networks, Systems Analysis and Design.

TRAINING & ADDITIONAL INFORMATION

- ASP.NET Backend Development Track — Dec 2025 – Present | Intensive hands-on training covering MVC, Web API, Entity Framework Core, SQL Server, LINQ, and software architecture.

- Front-End Diploma — Route Academy — 2025
- GDG On Campus — Benha University — 2024

LANGUAGES

Arabic — Native | English — Proficient (B2/C1)
